Element Selectors

Element Selector

The element selector selects HTML elements by their name / tag name *like a, h1, div, p etc.*

Example: Here, we use `<p>` as an element selector. The text inside the `<p>` will be center-aligned also blue color.

```
<!DOCTYPE html>
<html>
<head>
<style>
p {
  text-align: center;
  color: blue;
}
</style>
</head>
<body>
<p>This style will be applied on every paragraph.</p>
<p> Here also</p>
</body>
</html>
```
